

### Ref. A18376 FLYING AND CRAWLING PEST CONTROL 5L KING

Traps and eliminates flying and crawling insects

- ✓ **Ready to use**
- ✓ **Curative and preventive**
- ✓ **Effective against all flying and crawling insects**

#### APPLICATION

Traps and eliminates all crawling insects: ants, roaches, spiders, bugs, fleas and lice, and flying insects: flies, mosquitoes, wasps, etc.

Persistent insecticide with shock treatment by contact and ingestion. For protecting homes and other premises for at least 6 months outdoors and 12 months indoors. Powerful insecticide for curative and preventive treatment.

Use to treat areas where undesirable insects pass, hide and reproduce and eliminate them completely.

Resistant to cleaning thanks to a special resin content. Ready to use. Insoluble in water.

#### RECOMMENDED FOR:

- Cleaning companies
- Local authorities
- Insect-control companies
- Hotels and camping grounds
- Recreational centres

#### INSTRUCTIONS FOR USE

**Indoors:** Apply bands approx. 5 cm wide directly on skirting boards, pipes, woodwork, etc. Spray in hiding places: cracks, ventilation grilles, under cupboards, radiators (central heating), under refrigerators (power off), stoves (power off), behind furniture, etc.

**Outdoors:** Apply bands approx. 5 cm wide directly around premises: buildings, local authorities, storages, plants, etc., external doors and windows and where insects pass.

Dosage depending on the type and porosity of the surface and the degree of insect infestation:

- 1 liter for 10 to 20 m<sup>2</sup> for shock treatment
- 1 to 1.5 liters for 30 m<sup>2</sup> for general treatment of crawling insects
- 0.5 to 1 liter for 30 m<sup>2</sup> for general treatment of flying insects

When treatment is complete, wait 30 minutes then air the area for 1 hour.

Note: consider the life and reproduction of the insects to be treated: eggs, larvae, etc. which can last for at least a month. Plan a second application 2 to 3 weeks after the first and another 1 month later if necessary.

Do not apply to electric devices with power on, on windows, fabrics or hot surfaces. In case of doubt about a surface to be treated, test on a small, discreet area.

#### PACKAGING

Presentation: Container

Pack size: Carton of 4

5-liter container. Incineration does not generate pollution.

Pallet size: 128 units – 32 cartons

#### REGULATIONS

**FOR INDIVIDUAL AND PROFESSIONAL USE**  
TP18 Make sure this product is indispensable before use, particularly in general public areas. First try alternative methods and products with less health risks for humans and the environment. Use biocides with precaution.
